When millions around the world marched to protest the Iraq war and the US drive towards empire, the New York Times dubbed global public opinion "the second super-power". What empowered those protests was their alliance - if only for a brief moment - with governments unexpectedly willing to stand up to US pressure, and with the United Nations itself, when it followed its Charter's command to stop "the scourge of war".

Citizens, either individually or in communities of interest, will increasingly use technology to seek greater autonomy, which will challenge the power of government and institutions. For example, blockchain technology could foster new approaches to banking and personal finance.

The Challenges Of Industry 4.0 For Government - GE Reports

In Britain the working class was involved in the war - workers had to fight its battles, after all. There was a 'natural' desire to fight, to win and to nurse wounds. There was also considerable patriotism. But there is also evidence that these same people who sang patriotic songs during the war,...
