can my hp g72 b01sa support a intel i7 640m. it came with a p6100 and iv already put in a i5 520m which works fine. the service manual says an i7 620m is supported but the only difference between 620m and 640m is base/turbo clock speed so would a 640m work or would the bios not support this.
